

## GO-Global and Project-base

GO-Global, produced by GraphOn, allows you to deliver server applications such as Project-base to remote users or locations via your Wide Area Network (WAN) or the Internet. We've installed and tested GO-Global at KMS and the main thing we are impressed with is the speed, plus the fact it is near invisible to the end user. As an authorised reseller, KMS can also supply installation and training services.

### How it Works

GO-Global is similar in concept to Terminal Services or Citrix, however only drawing commands are sent to the user's screen instead of entire screen images. This gives excellent performance even over relatively slow connections. In addition, the server resources are used much more efficiently, multiple GO-Global sessions run on a single instance of the operating system without creating separate Windows sessions for each user.

### Key Benefits

- Remove the need to synchronise remote users.
- Single installation of Project-base makes system administration simpler.
- Licenses are concurrent (i.e. shared between users, just like Project-base!).
- Can be used with multiple server applications, not just Project-base.
- Client software can run on just about anything! Windows, Windows CE, Linux, Macintosh.
- Choice of technology – Full Client, ActiveX, Java, Internet Explorer, Netscape.

### Server Requirements

The following are guidelines (not minimums). Contact KMS with details of your server for further advice.

- Windows Server 2000, 2003
- Dual Processor CPU
- 512MB – 1GB RAM
- 1GB HDD space
- TCP/IP connectivity, Web Services
- 256KB or higher connection

### Other Considerations

If you want to make use of the mail merge and email features that Project-base offers, you will need to have a copy of Microsoft Office installed to the server, with access to your email server.

### Prices

GO-Global is priced per concurrent user, with a lower price per head for larger purchases. Support, maintenance and upgrades are included for the first year and is chargeable at £25 per license in subsequent years.

Concurrent User Licenses	Unit Price	Yr 2 Support (per license)
Up to 5	£169	£25
5 – 49	£159	£25
50+	Call!	£25
